

The flash of lighting of the Stukas: In 1939, France and Poland forces discovered the devastating impact of the "Stuka" (From German Sturzkampfflugzeug =Dive Bomber). First retained invincible, the Ju-87 discovered its limits, with terrible loses in the Battle Of Britain. The Spanish Experience:In fact, the JU-87 (the first prototype was built in 1934) was already used, in an experimental way, during the Spanish war. Then were tested dive bombing possibilities.
