

NOTE: This is an older FS-2002 compatible version. FS-2004 and FS-X users should get the new version available in FS-2004 and FS-X aircraft sections. The PD-808 is an electronic warfare aircraft, used by Italian forces. 27 were built, Piaggio found not anyone interested in it in the hard civilian business, and limited to produce just the ones requested by Italian Air Force (FFAA).
